

## **STATEMENT OF PURPOSE**

### **RS23909C1**

This legislation requests that the Craters of the Moon National Monument, as it existed prior to November 9, 2000, be designated as a national park. This designation would create our nation's 60th national park, and Idaho's only national park located completely within the borders of Idaho. There would be no change in land use or in management practices such as camping, hunting, and grazing.

## **FISCAL NOTE**

No fiscal impact
